

Bastion Digital Bank-in-a-Box

A complete, modular banking platform for licensed banks, EMIs, payment institutions and fintechs.

PRODUCTION
MODULAR
WHITE-LABEL

Modernize your banking. Keep your core.

Bastion combines customer apps, bank operations, payments, cards, accounting, compliance and reporting in one production platform - adapted around your license, partners and business model.

PLATFORM CAPABILITIES Modular banking software for complex financial operations.

Modular services and integrations

API-driven architecture

ONE COMPLETE PLATFORM

- Customer onboarding, KYB/KYC and AML workflows
- Multi-currency accounts, double-entry ledger, P&L and balance sheet
- Domestic and international payments, FX, fees and bulk payments
- Physical and virtual cards: issuing, authorization, settlement and reconciliation
- Web, mobile, admin, operations, compliance, support and finance workspaces

BUILT AROUND YOUR BUSINESS

- White-label branding, configurable roles, products, fees and modules
- Connect your own banks, processors and compliance providers
- Deployment environment and operating responsibilities are agreed for each project.
- Import customers, documents, accounts, balances, history and beneficiaries
- Full platform or selected modules, with deployment and support scoped for each project.

WHY BASTION

- A working production product - not a slide deck or collection of disconnected APIs
- Deployment options and launch milestones are defined around your requirements and integrations.
- Provider-neutral architecture reduces lock-in and supports future integrations
- Built-in ledger and reconciliation show where money moved and why balances differ
- Distributed engineering and product capability with implementation and support agreed for each deployment

ONBOARDING	ACCOUNTS	PAYMENTS	CARDS	LEDGER	RECONCILIATION
FX & FEES	BULK PAYMENTS	AML/KYC	CRYPTO	REPORTING	WEB & MOBILE

1 DISCOVERY

Map license, target market, providers, operating model and launch scope.

2 SCOPED PILOT

Define the pilot scope, environment, integrations and acceptance criteria for your institution.

3 PRODUCTION

Add dedicated integrations, cards, migration, SLA, scaling and customer-specific workflows.

REVENUE CONTROL

Flexible fee rules by client, operation, currency and product - with real-time P&L and reporting.

ACCOUNTING CONTROL

Trace money from the customer account through provider balances, ledger postings and reconciliation.

REAL-TIME EXPERIENCE

Balances, transactions, card events and alerts update across web and mobile without manual refresh.

BEST FIT

Licensed banks, EMIs, payment institutions, card program managers, fintech startups and digital-asset businesses.

MODULAR PLATFORM

Production banking platform experience since 2019. The catalogue includes modular software and previously implemented integrations; deployment scope is agreed separately.

Tell us your license, current providers and biggest operational bottleneck.

We will map a practical production path in one working session.
